## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 16-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lamar (3,624,385) in further view of Baird (2,728,964).
- 3. Lamar discloses the structural limitations and steps in method claims 16-21 as follows:
  - Providing one or more flowers (fig 2); providing an optical fiber lighting device that comprises a lighting device having a power source (fig 5), a light source driven by the power source to emit light (72); an array of optical fibers directly receiving light emitted by the light source (16); incorporating the lighting device with the flowers to provide an illuminated wearable flower display (fig 2, col. 2 lines 31-34).
  - Lamar does not disclose the flowers being fresh flowers. Baird discloses a
    corsage holder incorporating fresh flowers. It would have been obvious to one of
    ordinary skill in the art at the time the invention was made to use specifically
    fresh flowers in the device of Lamar since as taught by Baird, fresh flowers are
    commonly used in wearable flower displays (col. 1); the flower display is a
    corsage;

Art Unit: 2875

- With regards to the light device being an LED, The examiner takes Official Notice that the use of LEDs is old and well known in the illumination art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute an LED for the light source in the system of Lamar. One would have been motivated since LEDs are recognized in the illumination art to have many desirable advantages, including reduced size, high efficiency, low power consumption, long life, resistance to vibrations, and low heat production, over other light sources.
- The optical fiber lighting device further comprises a switch to turn the light source off and on (60);
- The power source is at least one battery (54);
- With regards to the device comprising a base that is incorporated with the flowers to form a corsage,
- 4. Claims 22-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lamar as applied to claim16 above, and further in view of WO 86/03105 (Shekleton et al).
- 5. Lamar discloses the invention as stated above. Lamar does not specifically disclose a base that is incorporated with the flowers to form a corsage. Shekleton et al discloses a holder for holding a corsage. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the device of Shekleton et al into the device of Lamar since Shekleton discloses the advantages of using a holder to hold a corsage in a selected array. One would have been motivated to use the

Art Unit: 2875

device of Shekleton in the device of Lamar for the purpose of holding the corsage of Lamar in combination with the optical light device since Shekleton discloses that his device secures the flowers in a nutritious and stable environment promoting enhanced life of a flower bloom.

• Figure 2 of Lamar clearly shows the optical fibers of the device being among the flowers in the corsage (16); With regards to the light device being an LED, The examiner takes Official Notice that the use of LEDs is old and well known in the illumination art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute an LED for the light source in the system of Lamar. One would have been motivated since Leeds are recognized in the illumination art to have many desirable advantages, including reduced size, high efficiency, low power consumption, long life, resistance to vibrations, and low heat production, over other light sources.

## Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anabel M. Ton whose telephone number is (571) 272-2382. The examiner can normally be reached on 08:00-16:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
